

Multibagger Coverage — Master Summary (2026-09-13 to 2026-09-21)

36 stocks analyzed over 9 daily cycles, one per market-cap band per day (Nifty 50 / Midcap 100 sample / Smallcap 250 sample / Microcap 250 sample), picked at random without repeats until each band's list cycles through. **Result across all 36: zero BUY or ACCUMULATE.** 33 landed at WATCH, 3 at AVOID.

Every figure behind every verdict is tagged by source tier (Tier 1-5) in the underlying dossier JSON — most are Tier 3 (aggregator-via-search) or Tier 5 (reconstructed), not Tier 1/2 audited-filing-verified. This is a directional screen built and run in an environment without live financial-data access, not investment research. See [multibagger/docs/Framework_v2.2_FULL.md](#) for the methodology and [multibagger/sample_data/daily/*.json](#) for full per-field sourcing on any name below.

Day 1 — 2026-09-13

Stock	Band	Sector	Gates	Tier	Call
Nestle India (NESTLEIND.NS)	Nifty 50	FMCG	4/10	WATCH	WATCH
Deepak Nitrite (DEEPAKNTR.NS)	Midcap	Chemicals	4/10	WATCH	WATCH
Carborundum Universal (CARBORUNIV.NS)	Smallcap	Industrials	4/10	IGNORE	AVOID
South Indian Bank (SOUTHBANK.NS)	Microcap	Financials (BFSI)	4/10	WATCH	WATCH

- **Nestle India:** Real pricing-power/scale moat, but no lock-in (switching costs, network effects RED). ~70x P/E on ~6% growth — fully priced, no credible mispricing case.
- **Deepak Nitrite:** Real backward-integration moat, but the dominant Phenolics segment is commodity-hit by Chinese dumping — EBITDA margin 23.5%→14.1%, ROCE nearly halved. Bear case looks correct on the evidence.
- **Carborundum Universal:** PAT fell 3 straight years, but mostly non-core (Russia sanctions, loss-making unit closures); standalone business actually improved. Still ~110x implied P/E — not cheap even net of the noise. Promoter holding drifted down 42%→39%, unexplained.
- **South Indian Bank:** Genuine NPA turnaround (PAT Rs45Cr→Rs1,455Cr), but moat rated skeptically (0 GREEN/5 RED) — sub-scale bank, no durable edge. Turnaround already well-covered as "highest-ever profit."

Day 2 — 2026-09-14

Stock	Band	Sector	Gates	Tier	Call
State Bank of India (SBIN.NS)	Nifty 50	Financials (BFSI)	5/10	WATCH	WATCH
Indian Hotels (INDHOTEL.NS)	Midcap	Hospitality	6/10	WATCH	WATCH
Caplin Point Labs (CAPLIPOINT.NS)	Smallcap	Pharma	6/10	IGNORE	AVOID
Sharda Cropchem (SHARDACROP.NS)	Microcap	Agrochemicals	7/10	IGNORE	AVOID

- **SBI:** Strong CASA/distribution franchise, but no moat source rates BUILDING; system share flat-to-eroding vs. private banks. Old news, already priced.
- **Indian Hotels:** Genuine V-shaped COVID recovery to record PAT, but already priced at ~49x trailing — mainstream story, no edge left.
- **Caplin Point Labs:** Debt-free, high-ROCE, real US-injectables growth. Credible variant-perception thesis built — but moat evidence is only Tier 4/5, correctly failing the trajectory gate on sourcing quality, not substance.
- **Sharda Cropchem:** Notable — actually *clears* the engine-growth gate (34.7% vs 7.7% required) on a genuine destocking recovery. Still AVOID: fails N1's earnings-dominance test (only 38.2% of required return from earnings) and governance only ACCEPTABLE.

Day 3 — 2026-09-15

Stock	Band	Sector	Gates	Tier	Call
NTPC (NTPC.NS)	Nifty 50	Utilities	3/10	WATCH	WATCH
Supreme Industries (SUPREMEIND.NS)	Midcap	Industrials	5/10	WATCH	WATCH
Vijaya Diagnostics (VIJAYA.NS)	Smallcap	Healthcare	5/10	WATCH	WATCH
Ujjivan SFB (UJJIVANSFB.NS)	Microcap	Financials (BFSI)	5/10	WATCH	WATCH

- **NTPC:** Cost-plus regulated tariff = no pricing power by design. Real capacity-growth story, but only Tier 5 evidence. Below-market P/E already reflects the regulated-return ceiling.
- **Supreme Industries:** Debt-free, ~21.5% ROCE, but pricing power honestly ERODING (PVC-resin competitive pricing pressure). Growth decelerated to ~7.4%. Rich ~42-50x multiple already prices in quality.
- **Vijaya Diagnostics:** Genuine growth story (20-24% CAGR, real share gain in a fragmented market) — but at ~90x P/E vs ~58x sector median with unanimous bullish coverage, already fully priced.
- **Ujjivan SFB:** All 6 moat sources RED — MFI-heritage sector stress is evidence *against* a moat. RBI returned its universal-bank licence application (Apr-2026). Already up ~40% on the turnaround narrative.

Day 4 — 2026-09-16

Stock	Band	Sector	Gates	Tier	Call
Hindalco (HINDALCO.NS)	Nifty 50	Metals	5/10	WATCH	WATCH
Tata Elxsi (TATAELXSI.NS)	Midcap	IT/ER&D	3/10	WATCH	WATCH
Ratnamani Metals (RATNAMANI.NS)	Smallcap	Industrials	5/10	WATCH	WATCH
Garden Reach Shipbuilders (GRSE.NS)	Microcap	Defence	6/10	WATCH	WATCH

- **Hindalco:** Honest commodity price-taker (pricing power RED). Real cost advantage from backward integration + Novelis recycling scale. Oswego plant-fire overhang already disclosed and covered by brokerages.
- **Tata Elxsi:** Worst-reasoned case that week — a *real* deceleration, not a mispricing. JLR concentration (~45% of revenue) transmitted the 2025 cyberattack + OEM R&D pullback into ~700bps margin compression. Bear case checks

out.

- **Ratnamani Metals:** Real hydrogen-pipe first-mover claim, no revenue attribution yet. Core business reads as an ordinary cyclical dip. Trades above peers already.
 - **Garden Reach Shipbuilders:** Strongest moat evidence of the day (security clearances, warship IP, GREEN-rated) with PAT nearly quadrupling FY22-26 — but priced in line with peers, and the next big order is already public knowledge.
-

Day 5 — 2026-09-17

Stock	Band	Sector	Gates	Tier	Call
Bajaj Finserv (BAJAJFINSV.NS)	Nifty 50	Financials (BFSI)	6/10	WATCH	WATCH
Balkrishna Industries (BALKRISIND.NS)	Midcap	Auto Components	5/10	WATCH	WATCH
Granules India (GRANULES.NS)	Smallcap	Pharma	4/10	WATCH	WATCH
Aavas Financiers (AAVAS.NS)	Microcap	Financials (BFSI)	5/10	WATCH	WATCH

- **Bajaj Finserv:** Strongest gate-clearance of the week to that point (clears engine growth, industry phase, moat trajectory). Allianz JV-exit catalyst is real but already widely reported.
 - **Balkrishna Industries:** First real near-miss on the engine-growth gate (19.8% vs 20.7% required) — validated the v2.2 graduated band. But PAT fell ~25% YoY on margin erosion; rich ~31x multiple not obviously justified.
 - **Granules India:** Real margin recovery (18%→22.1%) via mix shift — but promoter holding fell 38.82%→31.08% on a large recent sale, and there's an unresolved USFDA warning letter (OAI status).
 - **Aavas Financiers:** This week's most consequential finding — MD/CFO/CRO all resigned within months, coinciding with an open NHB inspection into loan-misclassification allegations. Correctly routed to MQF ELEVATED. Second engine-growth near-miss (90% of requirement).
-

Day 6 — 2026-09-18

Stock	Band	Sector	Gates	Tier	Call
ICICI Bank (ICICIBANK.NS)	Nifty 50	Financials (BFSI)	4/10	WATCH	WATCH
Alkem Laboratories (ALKEM.NS)	Midcap	Pharma	5/10	WATCH	WATCH
KPR Mill (KPRMILL.NS)	Smallcap	Textiles	5/10	WATCH	WATCH
Can Fin Homes (CANFINHOME.NS)	Microcap	Financials (BFSI)	4/10	WATCH	WATCH

- **ICICI Bank:** Genuinely one of India's best-run banks (3 of 6 moat sources GREEN) — but no Tier 1-3 evidence to clear the trajectory gate. No promoter since 2002; the 2018 Kochhar/Videocon matter is a resolved footnote.
- **Alkem Laboratories:** Actually *clears* engine growth (32.9% vs 20.1%) — but the agent caught this as a lookback-window artifact (lands on a real FY23 margin trough), not durable strength. Good methodological catch.
- **KPR Mill:** Agent caught a misleading "500% dividend" headline (actually Rs5/share, ~20% payout) before it distorted the dossier. Solid low-leverage exporter, but pricing power ERODING and already re-rated ~37%.

- **Can Fin Homes:** Cleaner governance than Aavas (99.66%-approved MD/CEO reappointment). Agent specifically tested and rejected the "Canara Bank funding-cost edge" hypothesis against a rating-agency source.

Day 7 — 2026-09-19

Stock	Band	Sector	Gates	Tier	Call
Wipro (WIPRO.NS)	Nifty 50	IT Services	2/10	WATCH	WATCH
AU Small Finance Bank (AUBANK.NS)	Midcap	Financials (BFSI)	5/10	WATCH	WATCH
Indian Overseas Bank (IOB.NS)	Smallcap	Financials (BFSI)	3/10	WATCH	WATCH
Mahamaya Steel Industries (MAHASTEEL.NS)	Microcap	Steel	3/10	WATCH	WATCH

- **Wipro: Worst gate score of the week (2/10).** Strong bookings haven't converted to revenue growth or peer-matching margins — specifically losing ground to TCS/Infosys/HCLTech, a fairly-priced laggard.
- **AU Small Finance Bank:** Strongest of the week's SFB cohort (RBI's first-ever in-principle universal-bank approval for an SFB) — but no GREEN moat source since credit-card/MFI-adjacent asset quality deteriorated. At ~4x book, arguably fully priced.
- **Indian Overseas Bank:** Agent surfaced a material fact outside the framework's own gates — government holds ~92.44% against a 25% minimum-public-shareholding rule, with the forbearance deadline already passed. Real dilution overhang.
- **Mahamaya Steel Industries:** Agent correctly identified the ticker (verified vs. a similarly-named but unrelated company) and excluded the wrong data. Sub-cost-of-capital ROCE, no moat, stock up +240% in a year to ~126x — a speculative run, not an overlooked compounder.

Day 8 — 2026-09-20

Stock	Band	Sector	Gates	Tier	Call
ITC (ITC.NS)	Nifty 50	FMCG/Conglomerate	3/10	WATCH	WATCH
REC Limited (RECLTD.NS)	Midcap	Financials (BFSI)	6/10	WATCH	WATCH
Bank of India (BANKINDIA.NS)	Smallcap	Financials (BFSI)	2/10	WATCH	WATCH
RHI Magnesita India (RHIM.NS)	Microcap	Industrials	3/10	WATCH	WATCH

- **ITC:** Correctly anchored on FY2026 as the clean post-demerger (ITC Hotels) year. Cigarette pricing power rated ERODING given the Feb-2026 GST/excise shock. 0% promoter holding correctly flagged as a structural fact, not a red flag.
- **REC Limited:** Strongest gate-clearance of the week (6/10, clears engine growth *and* industry phase) — but is set to merge into Power Finance Corporation by April 2027, a fact that matters more than any gate. Also surfaced a second real BFSI framework gap (Irani Accounting-Gap/Leverage-Trap lack a lender carve-out).
- **Bank of India:** Specifically checked and confirmed clear of IOB's live shareholding-compliance problem (~73.38% government holding, below the 75% ceiling). Trades at a discount to PSU peers for real, disclosed weaknesses

(declining CASA, an FY22 provisioning-divergence flag).

- **RHI Magnesita India:** Confirmed real, unambiguous identity (unlike Mahamaya Steel's near-miss). Agent tested and rejected a "market overreacts to one-off impairment" thesis — even on adjusted PAT, still ~45-49x.

Day 9 — 2026-09-21

Stock	Band	Sector	Gates	Tier	Call
Eicher Motors (EICHERMOT.NS)	Nifty 50	Automobiles	5/10	WATCH	WATCH
IPCA Laboratories (IPCALAB.NS)	Midcap	Pharma	3/10	WATCH	WATCH
SKF India (SKFINDIA.NS)	Smallcap	Auto Components	3/10	WATCH	WATCH
BEML (BEML.NS)	Microcap	Defence/Capital Goods	6/10	WATCH	WATCH

- **Eicher Motors:** Genuine mixed-bag moat — real export momentum, but switching costs RED and efficient_scale ERODING as Bajaj-Triumph/Hero-Harley/Honda enter Royal Enfield's core segment. Third near-miss on engine growth this run.
- **IPCA Laboratories:** Decade-long USFDA compliance improvement, but a fresh Form-483 as recently as Dec-2025 keeps every moat source at HOLDING, not BUILDING. Promoter holding drifted down around the Unichem acquisition.
- **SKF India:** Agent caught a real structural change (Oct-2025 demerger of the industrial-bearings business) and excluded a PAT figure that actually belonged to the newly-separate entity.
- **BEML:** Record order book, but FY26 PAT nearly halved despite record revenue. The often-cited "privatization upside" thesis was checked and found stale (traces to 2019-2021, no confirmed 2024-26 progress).

Overall patterns across all 36

1. **Zero BUY/ACCUMULATE.** The framework's own hardest gate (Section 5e engine growth) was the single most common blocker — but 4 names actually cleared it outright (Sharda Cropchem, Alkem [flagged as a lookback artifact], Bajaj Finserv, REC, BEML) and 2 more landed as genuine near-misses (Balkrishna Industries, Aavas Financiers), validating the graduated near-miss band added in v2.2. 2. **The binding constraint was usually N7 (variant perception), not weak fundamentals.** In the large majority of cases, agents explicitly declined to construct a "market has it wrong" thesis because the evidence didn't support one — that's the framework's M3 edge-hypothesis rule working as intended, not a research shortfall. 3. **Real governance findings surfaced, not manufactured ones:** Aavas's MD/CFO/CRO resignation cluster + open NHB inspection; Ujjivan's rejected universal-bank licence; IOB's overdue shareholding-compliance deadline; Sharda Cropchem's and Alkem's promoter-holding declines. 4. **Corporate-structure catches mattered:** REC-PFC merger, SKF India's Oct-2025 demerger, ITC Hotels' Jan-2025 demerger, Eicher's VECV equity-accounting, Mahamaya Steel's/SKF's ticker-identity disambiguation from similarly-named but unrelated companies. 5. **Two real framework gaps found and one fixed** (documented in FRAMEWORK_v2.2.md): the G1 BFSI leverage carve-out (fixed), and the Irani Accounting-Gap/Leverage-Trap BFSI carve-out (found, not yet fixed).

Full detail, gate tables and per-field source tiers for every name: individual JSON dossiers under multibagger/sample_data/daily/ and the nine daily reports under multibagger/reports/daily/ (2026-09-13 through 2026-09-21, .md and .pdf).
